jayanthram2528@gmail.com <https://dinq.me/jayanth>

SUMMARY

Pre-final year Computer Science and Engineering (Artificial Intelligence and Machine Learning) student with web development experience. Proficient in Java, and SQL, with strong problem-solving skills and hands-on experience building real-world applications. Active participant in academic projects and hackathons, with proven teamwork and collaboration skills. Served as **Vice President** of the IEEE Computational Intelligence Society (IEEE CIS), demonstrating leadership and organizational abilities

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering (AI & ML)

Expected 2027

Vidyavardhaka College of Engineering, Mysuru

CGPA of 8.22

PUC(PCMB), STG PU College , grade of **91.66%**

2021 - 2023

SSLC, Adarsha Vidyalaya(RMSA) ,grade of **96.32%**

2020 - 2021

SKILLS

- **Programming Languages:** Java,Python,SQL
- **Web Technologies:** HTML5,CSS3,JavaScript,React.js,Express.js,Node.js
- **Databases:** Mysql, MongoDB
- **Cloud & Data:** Snowflake, BigQuery, SQL
- **Core Subjects:** DSA,OOPS,CN,ML,DBMS
- **Soft Skills:** Leadership,Team Collaboration , Decision Making
- **Tools:** Git,GitHub,VS Code, Postman

EXPERIENCE

AI Strategy & Business Intelligence Inter(Virtual)

IBM skillsBuild|CSRBOX|

- Developed and maintained web-based applications using modern web technologies.
- Collaborated on frontend development and backend API integration to enhance application functionality and user experience.

PROJECTS

- **Agricultural Export Certification Platform:** Designed a web-based portal enabling exporters and QA agencies to upload product details, perform quality inspections, and generate verifiable digital certificates for agricultural produce
- **Inventory Management System (MERN Stack):** Designed a full-stack web application to track products, stock movements, and generate reports. Implemented JWT authentication, role-based access control, analytics dashboard, and PDF/Excel export features for efficient business operations
- **Digital Fuel Indicator System using Arduino:** Designed a microcontroller-based digital fuel monitoring system using Arduino Uno and ultrasonic sensor to measure fuel levels accurately and trigger low-fuel alerts using buzzer and LEDs. It measurement reliability over traditional analog methods and designed a real-time fuel display system

CERTIFICATIONS

- IBM SkillsBuild Project-Based Learning Program – CSRBOX
- Qualified participant in “Quantathon” conducted by **IIT Madras** (Shaastra 2025)
- Saviynt Certified – Identity Security for AI Age, Saviynt — Jan 2026
- Participated in Hackabhigin – National Level 24-Hour Hackathon
- Arduino Bootcamp: Learning Through Projects-Coursera

ACHIEVEMENTS & ACTIVITIES

- **1st Runner -up** of pathcraft-the gen ai webpage architect challenge
- Successfully organized a **Data-thon event**, facilitating dataset sharing, participant coordination, and technical support to ensure smooth execution of data-driven challenge
- **NPTEL – Smart Cities** | Elite + Gold | 91%
Successfully completed a 12-week IIT-certified NPTEL course
